

MONDAY FULL BODY		QUADS & CHEST LEAD
1	Leg press	3 × 8–15
2	Incline dumbbell press	3 × 6–10
3	Lat pulldown Full reach overhead every rep. This is your width exercise.	3 × 8–12
4	Dumbbell lateral raise Light. Shoulders DOWN, never shrug. Neck burning = too heavy.	3 × 12–20
5	EZ-bar curl	2 × 8–12
6	Overhead triceps extension	2 × 10–15
7	Cable crunch ABS Hold weight and ADD to it over months. Abs only grow if you load them.	3 × 10–15

WEDNESDAY FULL BODY		BACK & HAMSTRINGS LEAD
1	Seated cable row Pull to your belly button, elbows close to your sides.	3 × 8–12
2	Seated hamstring curl	3 × 10–15
3	Machine chest press	3 × 8–12
4	Dumbbell lateral raise	3 × 12–20
5	Incline dumbbell curl	2 × 8–12
6	Triceps pushdown	2 × 10–15
7	Hanging or lying leg raise ABS Slow, no swinging. Curl your hips up at the top — that is the rep.	3 × 10–15

FRIDAY FULL BODY		SHOULDERS & ARMS LEAD
1	Leg press	3 × 10–15
2	Lat pulldown	3 × 8–12
3	Seated dumbbell overhead press Stop just short of shrugging at the top.	3 × 8–12
4	Seated hamstring curl	2 × 10–15
5	Dumbbell hammer curl	3 × 10–15
6	Overhead triceps extension	3 × 10–15
7	Rear-delt fly machine Elbows at shoulder height. Never above.	2 × 15–20

Missing a day barely costs you now — every session hits everything, so a skipped Wednesday no longer wipes out your back for the week. **No time?** Do the two shaded exercises and leave.

WHY FULL BODY, NOT PUSH/PULL Three days of push/pull/legs trains each muscle once a week . This trains everything three times a week on the same three days. Same hours in the gym, more growth, and one missed day no longer erases a body part.	WHY 17% SHOWED NO ABS 17% is not six-pack territory — abs start near 12–15%, a real six-pack near 10–12%. Scales and calipers read 5–8 points low , so 17% was probably low 20s. You were not at 17%, and had no ab muscle to reveal.	HOW HARD — THE BIG ONE Last set of every exercise: go until you cannot get another clean rep. Earlier sets, stop 1–2 short. 3 seconds lowering, full stretch at the bottom, no bouncing.
ADDING WEIGHT Hit the top rep number on every set? Go up next session. +5 lb per dumbbell • +10 lb machines. 6–12 reps on the big lifts, 12–20 on the small ones.	YOUR ARMS — UNEVEN AND GROWING Every dumbbell set: weaker arm first, then match its exact rep count with the strong one. Never do extra. A dominant arm is normal and it evens out over months.	EVERY DAY Protein 1 g per lb of goal weight. Creatine 5 g. Salt your food. Sleep 7–9 h. Losing slowly is what protects the 450 to 730 and your arms.
